

70V LANDSCAPE SYSTEMS

ALL THE POSSIBILITIES

One of the tremendous advantages of a 70V Landscape System is the ability to design the specific audio space desired, regardless of the dimensions or shape of the outdoors.

From a simple sub/sat system near the patio, to massive design with numerous subs and satellites covering literally acres of landscape, the scalability is essentially limitless. Any coverage and performance parameters you can imagine are now possible.

70V LANDSCAPE SATELLITES

DESIGN WITH FLEXIBILITY

Still, all landscape satellites can be formatted for either 70V or 8-Ohm taps in order to provide maximum flexibility in designed the perfect outdoor system.

Our LS and OSUB models house a 70v/8-ohm tap capable of powering each loudspeaker up to half a mile from the source. Regardless of the size of your area, we can design a system to cover it.

VIRTUALLY UNSEEN SATELLITES

Our 70V Landscape Satellite Speakers' camouflage finish blends perfectly into natural landscape environments, and multiple speakers can be linked that virtually disappear into the landscape.

PASSIVE RADIATOR

Moving the maximum amount of air is the key to great bass, and the LS64 features a passive radiator on the bottom to significantly improve bass response.

For outdoor loudspeakers that need to cut through the noise at high-volumes, titanium was the only choice for our tweeters. Titanium does a fantastic job of playing loudly, but unlike aluminum, it doesn't carry a harsh edge, and does not cause ear fatigue.

EXPAND THE RANGE

Several mounting options can be purchased separately, such as treemounts or spikes driven into the ground, to produce custom, full range musical coverage of any space.

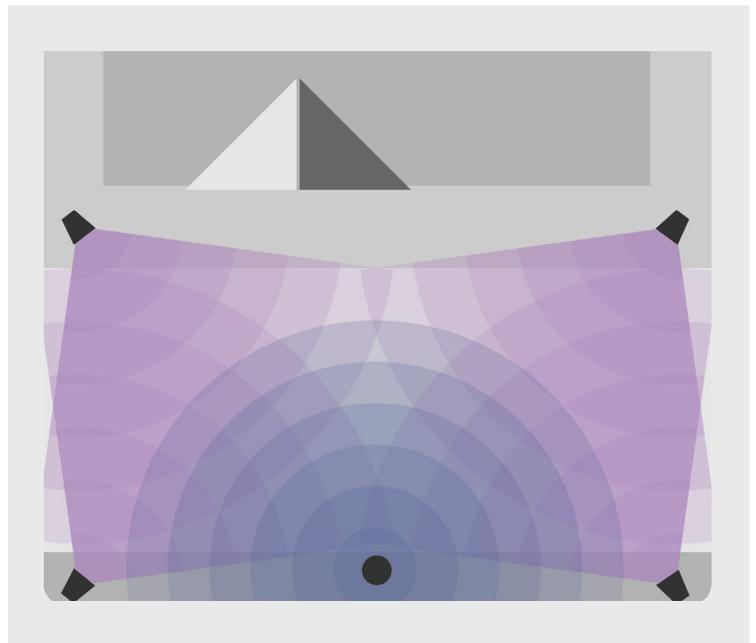

70V LANDSCAPE SUBWOOFERS

INVISIBLE BASS

If that ever-elusive thump is what you are looking for, look no further than our three different subwoofers, also featured in our 70V Landscape Systems Collectio. These outdoor Subwoofers are buried below ground and can be hidden between garden plants, with only a tune port exposed.

Creating that bass outdoors is a unique challenge due to the absence of defined space, and these subs will allow an incredible to bass response to fill the area. Engineered to support the lowest frequencies. The resulting effect is earthshaking bass and pristine high frequencies filling the environment with sound usually confined to indoor spaces.

RESIST THE STORM

Well suited to withstand the harshest climates, all landscape speakers are enclosed with rugged injected molded plastic. Both the landscape satellites and the in-ground subwoofers are backed by our 5 Year Limited Warranty.

70V LANDSCAPE SYSTEMS

SPECIFICATIONS	LS64 *	LS44 *
Part	OLS6600	OLS4400
Woofers	6" Poly, Passive Radiator	4 1/2" Poly
Tweeter	1" Titanium	3/4" Titanium
Frequency Response	60Hz-20kHz	80Hz-20kHz
Power RMS	50 Watts	50 Watts
Power Peak	150 Watts	150 Watts
Impedance	70V 8 Ω	70V 8 Ω
Transformer Taps	70V – 50W 25W 12.5W 6.25W	70V – 30W 15W 7.5W 3.75W
Dimensions	Ø 7" x 11" L (Ø 178 x 279 L mm)	Ø 5 5/16" x 8 5/16" L (Ø 135 x 211 L mm)

SPECIFICATIONS	OSUB12	OSUB10	OSUB8
Part	OSUB12000	OSUB10000	OSUB8000
Woofers	12" Poly	10" Poly	8" Poly
Frequency Response	23Hz-100kHz	32Hz-100kHz	39Hz-100kHz
Transformer Taps	300 Watts	300 Watts	100 Watts
Impedance	70V 8 Ω	70V 8 Ω	70V 8 Ω
Dimensions	Ø 17 3/4" x 23 1/2" H (Ø 451 x 597 H mm)	Ø 15 3/4" x 21 1/2" H (Ø 400 x 546 H mm)	Ø 12 13/32" x 21 3/16" H (Ø 315 x 538 H mm)
