#### **3 COLOR SELECTIONS**

360° DISPERSION TWEETER

### **ALUMINUM SLEEVES**

### ALSB106K • ALSB85 • ALSB64

The Ambisonic Hexagonal Luxury Bollard Collection is the latest level up in outdoor listening: a combination of outdoor sound and look, unparalleled in design and construction. Ambisonic Landscape Bollards are engineered for years of listening satisfaction and pleasure. The ported composite enclosure and all components, including our conical ribbon tweeter, are designed to withstand the harshest of environmental conditions in any permanent outdoors installation.

Ambisonic Systems has delivered high performance experiences in luxury outdoor settings for decades. Our Ambisonic Landscape Bollards proudly feature the same proprietary technologies and quality materials.

An iconic 1" high definition conical ribbon tweeter surrounds you in 360° of detailed sound, with incredible clarity. Meanwhile, the integrated burial subwoofer delivers the punch, impact and clean tight bass necessary for the outdoors, perfectly complimenting the higher frequencies with the low. The result? Backyards, patios, and pool areas come alive with a powerful 360° outdoor sound immersion experience.

Available in 3 sizes, you can select the optimum visual and acoustic impact required for any outdoor setting. The all-weather hexagonal exterior sleeves are obtainable in 3 colors: Champagne, Silver or the classic for the evening, Black.

Ambisonic Bollards must be installed with Origin PRO Amplifiers for a seamless,

optimal listening experience, with ready-to-go, dedicated DSP profiles.

Ambisonic Landscape Bollard Loudspeakers

### Conical Ribbon Driver

Each Ambisonic Landscape Bollard features a highly efficient conical ribbon driver, in true Ambisonic style, with an ultra-sensitive aluminum diaphragm, energized by a neodymium motor, capable of accentuating your audio signals into the ultimate high fidelity reproduction, with minimal distortion.

These were designed and constructed to project sound longer distances than previous bollards, so prepare yourself to witness those deeply important key transients and enjoy those higher frequency nuances in any outdoor setting.
