

PORTED BASS BLENDSCSUB10

Welcome to the Boundaryless Listening Experience with Natural Depth Sound.

Complementing the new BLENDSTM invisible loudspeaker series, a unique sound solution in installations where the integrity of the room aesthetic cannot be compromised.

BLENDSCSUB10 • PORTED BASS

**MINIMALLY VISIBLE
INSTALL,
HUGE SOUND**

The BLENDSCSUB10 Ported Bass (open via port with customizable trim) is a minimally visible In-Wall Subwoofer specially built to pair with the BLENDSTM Invisible Speaker series. Bring even deeper bass and fuller sound to invisible speaker installs from a 10" woofer.

**REVOLUTIONARY,
LOW-END**

Built to WOW homeowners and design-first audio enthusiasts using the latest technology. While wide dispersion invisible speakers offer greater flexibility in design-centric installations than traditional architectural speakers, this subwoofer is revolutionarily installed direct to studs within the wall structure, leaving only a slim, minimally visible flush-mount grille opening towards the lower end of the wall. Additionally, the grille can be custom painted to camouflage in, hidden from view.

The result? A rich bass that will accompany, embody, and emanate without disrupting the room's look and feel.

**PLACED TO
ACCENTUATE**

The low frequency output can still be enhanced by an extra 3dB, when placed correctly to harness the floor and corner reflections to enhance the additional output.

PORTED BASS BLENDSCSUB10

DIRECT-TO-STUD READY

The BLENDSCSUB10 Ported Bass installs precisely and swiftly, ready to be securely installed direct-to-stud, designed to fit between 16" (406mm) on-center framing. The BLENDSCSUB10 **MUST** be installed in new construction during the pre-wire phase. Best installed low to floor just above baseboards for nearly invisible bass out of eye-line.

RECOMMENDED APPLICATIONS

The Ported Bass works seamlessly with BlendsTM installs to layer the listening space with low-frequency from behind the wall. When bass is needed without taking up space, pair BLENDSCSUB10 with other design-centric indoor audio solutions such as Minimal Opening System (MOS).

Note: We highly recommend installing the BLENDS speakers with Origin PRO Amplifiers for a seamless, optimal listening experience. Best paired with Invisible Series, Minimal Opening Collection, and general distributed audio speakers.

SPECIFICATIONS	PORTED BASS (PORTED IN-WALL SUBWOOFER)
Product ID	BLENDSCSUB10
System Type	PORTED IN-WALL SUBWOOFER (WITH CUSTOMIZABLE TRIM)
Crossover	HPF: 25Hz (48dB/Oct BW, LPF: 120Hz or less, 48dB/Oct BW
Driver	10" Neo-Magnet, Rigid Aluminum Cone, Rubber Surround, Shallow Woofer
Frequency Response	32Hz-120Hz • -10dB with Origin PRO DSP 37Hz-120Hz • -3dB with Origin PRO DSP
Maximum SPL @ 1m	113 dB Continuous Program • 116 dB Peak
Sensitivity (1W / 1m)	90 dB
Power Handling	200W Program • 400W Peak
Recommended Amp Power	LF-50W - 400W @ 4 ohms (Amp must be limited to 200W RMS (28.3V) for protection
Rated Impedance	4 ohms
Input Connectors	Euro Block
Enclosure Material	Extruded Aluminum Enclosure
Mounting	Direct to Stud Mounting Plates (In-Wall Installation only)
